

European Latin Keyboard version 1.2

This keyboard is designed to enable simple input of most Latin script languages, including all major European Latin-script languages. The keyboard uses punctuation and letter keys in sequence to access diacritic and other letters not on an English keyboard and has been designed to be usable on any Latin script keyboard layout. Some of the languages supported include:

Afrikaans	Galician	Saami (Inari, North, South)
Albanian (Arbëreshë, Arvanitika, Gheg, Tosk)	German	Serbian
Balearic	Hungarian	Slovak
Basque	Icelandic	Slovenian
Breton	Inuktitut	Serbian (Latin script)
Catalan	Italian	Sorbian (Lower, Upper)
Croatian	Kashubian	Spanish
Czech	Ladin	Swedish
Danish	Latvian	Tagalog
Dutch	Lithuanian	Turkish
Esperanto	Maltese	Valencian
Estonian	Norwegian	Vlaams
Faroese	Nynorsk	Walloon
Finnish	Polish	Welsh
French	Portuguese	Zulu
Gaelic (Irish and Scottish)	Romansch	

Fonts

All of the characters accessible in this keyboard are included in the font **Tahoma**. Most of the letters are also available in **Times New Roman** and **Arial** and other fonts included with Windows, as well as many other fonts. Some of the rarer letters (such as **ĥ**) will typically only be available in specialty fonts.

European Latin keyboard shortcuts

Type prefix key on the left, followed by key on top row to get character.
